PROFORCE AXIVCORE TOUR GREEN is an all-new, tour-proven design that integrates AXIV – a true weave, 4-axis material – within the inner walls of the tip section only, providing a flexurally stable, torsional responsive tip profile for lower ball flight, reduced spin and better shot-making control without sacrificing feel. This tip-balanced shaft's center of gravity is closer to the tip so players can better feel the position of the clubhead throughout the swing. The Green Series uses superior high modulus carbon fiber in the butt and mid section and is available in multiple weights and flexes to fit various swing profiles.

PROFORCE V2 TOUR BHYBRID is design specifically for touring professionals who trust heavier, lower torque hybrid shafts, like UST Mamiya's Tour Hybrids, to provide narrower dispersion angles. Such shafts are a necessity for players with quick tempos and correspondingly fast club head speeds. The UST Mamiya Tour Hybrid line, however, is equally as effective for those simply wanting to improve their overall shot control. Now this advanced technology is available to all players, through the UST Tour Shop.

THE FREQUENCY FILTERED™ PUTTER SHAFT is a radically new putter shaft designed to improve the ability of all players to perceive or feel where ball impact occurs on the face. This instantaneous feedback results in improved putting ability since the player learns to consistently stroke more putts on the sweet spot of the putter. Feel becomes clearer and so does the confidence to make solid contact.

Filtering Diffuser in the mid-section filters out higher, unwanted vibrations. Therefore, only the true feeling of the ball impacting the putter face is released to the hands.

Interlinked Carbon fiber in the butt-section creates a tremendous amount of hoop strength for a consistently solid feel in the hands.

# 2011 MAP Policy & Ordering Information

UST Mamiya implemented the MAP (Minimum Advertised Pricing) policy in January 2003. MAP includes any and all published, printed, electronic, or mailed advertisements or price lists. The policy is necessary to protect the valuable, high quality brand image of UST Mamiya products. We trust that you understand the significance of protecting the UST Mamiya brand and appreciate your cooperation in following the MAP policy. If you are considering an ad campaign featuring UST Mamiya shafts, and have any questions relating to MAP, please call us to clarify *before* running the ad or listing the sale.

To further clarify our intent and position regarding the policy, UST Mamiya has a "3 strikes" enforcement system for customers found violating the MAP policy. It shall be in UST Mamiya's sole judgment that a violation has occurred and violating customers are notified as follows:

**First Infraction** - Written notification by Certified Mail to the violating party that shipment of those models advertised below MAP will be discontinued for a period of 30 days from the date of the notice.

**Second Infraction** - Written notification by Certified Mail to the violating party that shipment of those models advertised below MAP will be discontinued for a period of 90 days from the date of the notice.

**Third Infraction** - Final written notification by Certified Mail to the violating party that sales of all UST Mamiya products will be discontinued as of the date of the notice and the customer will be removed from our database.

**Exception:** If the violating party does not violate the MAP policy again for a period of 18 months after the date of the notification of the 1st violation, a written request may be submitted to UST Mamiya to have the first strike removed, and the customer status is cleaned.
